Riya Pandey

I am proficient in creating the user-facing elements of websites. I employ languages like HTML, CSS and JavaScript which are my areas of expertise, to create engaging and visually appealing user interfaces. I'm adept at translating design mockups into functional web pages, ensuring seamless navigation and optimal user experience. I am certified in Microsoft Power Bi which shows my interest in Data analytics.

PROJECTS

- Portfolio Website – Front-End project – I built my own portfolio website to showcase my projects, skills, and achievements. This project not only highlights my technical abilities but also my eye for design and user experience.
